SUMMARY

Third-year B.Tech Computer Engineering student with interests in Cybersecurity, Networking, and Security Operations. Seeking an internship to gain hands-on experience, apply technical skills, and grow in the cybersecurity field.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering (GTU)

Sardar Vallabhbhai Patel Institute of Technology (SVIT)

08/2023 – Present

Vasad

HSC

Royal Science School

2021 – 2023

Dhoraji

SKILLS

Technical Skills

- Cybersecurity Fundamentals
- Networking Fundamentals (TCP/IP, DNS, DHCP)
- Linux
- Python
- Identity and Access Management (IAM)
- Access Control & RBAC
- Security Monitoring
- Wireshark
- Active Directory (Basic)
- Git & GitHub

Soft Skills

- Problem Solving
- Analytical Thinking
- Adaptability
- Team Collaboration
- Time Management
- Continuous Learning

CERTIFICATES

TryHackMe

- Pre Security
- Introduction to Cyber Security
- Network Fundamentals

LANGUAGES

- English
- Gujarati
- Hindi

PROJECTS

Basic Security Monitoring & Threat Detection

Concepts: Security Monitoring, Log Analysis, Threat Detection, Incident Reporting

- Analyzed system and authentication logs to identify suspicious activities.
- Monitored failed login attempts and potential brute-force attack indicators.
- Documented security events and created incident summary reports.
- Studied common threat patterns and security monitoring practices.

Identity & Access Management (IAM) Simulation

Concepts: IAM, RBAC, Least Privilege, User Provisioning

- Simulated user provisioning and de-provisioning processes for employees.
- Implemented Role-Based Access Control (RBAC) to assign permissions based on job roles.
- Managed user accounts, roles, and access permissions following least-privilege principles.
- Generated access review reports to support security and compliance requirements.

Security Log Analyzer Using Python

Skills: Log Analysis, Security Monitoring, Threat Detection

- Developed a Python-based tool to analyze security log files.
- Detected multiple failed login attempts and unusual login behavior.
- Generated automated alerts and summarized security events.

- Improved understanding of log analysis and security monitoring workflows.

Network Traffic Analysis Using Wireshark

Concepts: Network Monitoring, Packet Analysis, Protocol Analysis, Network Security

- Captured and analyzed network traffic using Wireshark.
- Examined common protocols such as TCP, UDP, DNS, DHCP, and HTTP/HTTPS.
- Identified unusual network behavior and potential security risks.
- Documented findings and improved understanding of network communication and security monitoring.
